New Resources

The resources page on STEM North has been updated to include more online resources, lesson, unit plans, and more!

In Local News...

Photo borrowed from CMS Facebook

In November, CMS welcomed Let's Talk Science to their school! Volunteers visited classrooms, sparking curiosity with STEM wonders. Each class explored engaging demonstrations with LTS presenters. Students engaged, asked great questions, and experienced lots of "wow!" moments throughout the day!

This year's STEM Fest will take place at James M. Hill School on **Saturday, March 21st, 2026**. Students can participate even if their school is not hosting their own fair. For full details and support resources, visit:
