Inspire your students to become climate leaders with The Gaia Project's free, hands-on sustainability programs — designed for K-12 classrooms and aligned with your curriculum. Whether you're exploring energy, waste, air quality or climate action, Gaia provides ready-to-use resources, in-class programs, and real-world connections that make learning engaging and impactful. Programs are available in English and French. Sign up today and turn your classroom into a hub for change: [The Gaia Project Programs](#)

Try This!

*Did you know that your elementary school has an **Inquiry Kit**?*

Designed for Gr. 3-5 but adaptable a few grades higher and lower.

Check it out here!

[Inquiry Kits](#)

Resource Spotlight!

Need a quick way to spark curiosity? Former NASA engineer Mark Rober uses creative experiments and engineering challenges to make K-12 science engaging, accessible, and connected to real-world problem solving.

On the Calendar

[Nature NB Birding Kits](#)

Deadline: Oct 16

[COE-Language Learning](#)

Birding kits for grades 3-8, with lessons and kits in English and French.
